9. Rules the system enforces for you
10. Quick answers

1 What Envision ERP does

Envision ERP runs a training institute from first enquiry to final placement. Every step a learner goes through has a screen, and each screen passes its work to the next one, so nothing is typed twice.

The menu groups

GROUP	WHAT IT HOLDS
Dashboard and Document Vault	Always on the menu bar. The live snapshot of the institute, and your private file drive.
Master	The records everything else points at: students, trainers, courses, batches, classrooms and labs, staff, corporate partners.
Admissions	The money-making pipeline: enquiries, follow-ups, admissions and fee collection.
Academics	Daily teaching and assessment: trainer's classes, classwork, attendance, exams, results, readiness, and the student self-service pages.
Resources	Certificates, library, inventory, placements and the student portfolio.
Reports	Revenue and enrollment reports, exports, and anonymous trainer performance.
Settings	Institute settings, global settings (numbering, letterhead, scheduling rules), users, roles and permissions.

One principle runs through the whole system: what you can see and do comes from your **role**. The menu only shows what your role allows, and the server checks every request again, so typing a web address you are not allowed to open simply returns "403 Forbidden".

2 Signing in

The login page offers four doors, one per kind of user. All of them use the same account system; the door only decides the look of the page and where you land.

DOOR	FOR	CAN CREATE AN ACCOUNT HERE?
Administrator	Super Admin and Administrator, and also the internal roles: Branch Head, Academic Coordinator, Front-Desk Registrar and Staff.	No. Administrator accounts are created inside the software (Settings, User Management), never self-registered.
Trainer	Faculty	Yes. The trainer profile is created automatically once the email is verified with the one-time code (OTP).
Placement Officer	The placement team	Yes
Student	Enrolled learners	Yes. The student record is created automatically after email verification.

Step by step

1. Open the software and choose your door.
2. Type your email and password and press **Sign in**.
3. If you used the wrong door, you are still signed in and simply taken to your own portal.
4. Forgot your password? Press **Forgot password?** on the login page and follow the email.

Accounts created by an administrator work immediately. The password is **not** emailed, so the administrator hands it over and the person should change it.

3 Finding your way around the screen

Every page has the same frame: the coloured **header** at the top, the **menu** (down the left side, or across under the header, whichever you choose), and the page itself.

The header, left to right

ITEM	WHAT IT DOES
Menu button (phones and tablets)	Opens the navigation drawer.
Logo	Takes you back to the Dashboard.
Title	The institute name and the page you are on.
Search (Ctrl + K)	Opens the search box to find and jump to a screen quickly.
Help (?)	Explains the page you are on: what it is for, how to use it, how to fill its form. Available in English, Marathi and Hindi.
Language	Switches menus, headings and buttons between English, Marathi and Hindi. Records stay as they were typed.
Sun / Moon	Light or dark colours.
Chat	Internal messages between staff and trainers. Students are not in the chat directory.
Bell	Live notifications: new admissions, fee payments, enquiries, warnings.
Sliders (Theme switcher)	A side panel for the look of the whole portal: colour mode, left-to-right or right-to-left, vertical or horizontal menu, how menus open, side-menu style, page style, full or boxed width, fixed or scrolling menu and header, the page loader, menu and header colours, brand colour and background tint. Every choice is remembered; Reset restores the original look.
Gear (Settings)	Opens the Settings page.
Sign out	Ends your session.
Your initial	Profile menu: My Profile, Settings, Sign Out.

Common patterns on every list page

- **Search box** and **filter chips** narrow the table.
- The **pencil** on a row edits it; the **bin** deletes it (partners are only soft-deleted and can be restored).
- The main action button (for example **New Student**, **Add Room**) sits at the top-right.
- Many lists offer **Excel import and export**.
- Forms open as a full page with **Save** and **Cancel** at the top-right. If something is wrong, a red banner at the top says exactly what to fix and nothing is saved.
- On a phone, a bar at the bottom of the screen gives one-tap access to the main screens.

4 Roles, and what each one is for

There are nine built-in roles. A role is a bundle of permissions such as *fees.manage* (take money at the desk) or *certificates.issue*. The Super Admin and Administrator can adjust any role on the **Roles & Permissions** screen; what follows is how the software ships.

Super Admin

130 permissions · 32 menus

The owner or the one person responsible for the system. Signs in through the **Administrator** door.

WHAT THEY CAN DO

- Every screen and every action in the software.
- The only role that can delete user accounts and roles.

WHY THIS ROLE HELPS

- Nothing is out of reach, so there is always someone who can fix anything.
- The system refuses to remove the last Super Admin, so the institute can never lock itself out.

LIMITS

Keep this to one or two people. Everyday work should be done from a narrower role.

MENUS THEY SEE

Dashboard, Document Vault, Students, Trainers, Courses, Batches, Classrooms & Labs, Staff, Corporate Partners, Enquiries, Follow-ups, Admissions, Fee Collection, My Classes, Classroom, Attendance, Examinations, Results, Student Readiness, Rate Trainer, My Attendance, Certificates, Library, Inventory, Placements, My Portfolio, Institute Reports, Trainer Performance, Institute Settings, Global Settings, User Management, Roles & Permissions

Administrator

128 permissions · 32 menus

The institute manager who runs day-to-day operations. Signs in through the **Administrator** door.

WHAT THEY CAN DO

- Everything a Super Admin can do except delete users and delete roles.
- Create users, change roles and permissions, change settings, see all money and all academics.

WHY THIS ROLE HELPS

- Runs the whole institute without the risk of destroying accounts or roles by mistake.

LIMITS

Cannot delete users or roles. Disabling sign-in is the safer alternative anyway.

MENUS THEY SEE

Dashboard, Document Vault, Students, Trainers, Courses, Batches, Classrooms & Labs, Staff, Corporate Partners, Enquiries, Follow-ups, Admissions, Fee Collection, My Classes, Classroom, Attendance, Examinations, Results, Student Readiness, Rate Trainer, My Attendance, Certificates, Library, Inventory, Placements, My Portfolio, Institute Reports, Trainer Performance, Institute Settings, Global Settings, User Management, Roles & Permissions

Branch Head

121 permissions · 30 menus

The head of one centre or branch. Signs in through the **Administrator** door.

WHAT THEY CAN DO

- Every operational module: students, admissions, fees (both collecting and pricing), expenses, profit and loss, academics, certificates, library, inventory, placements, reports.
- Can open Settings and Global Settings to read them.

WHY THIS ROLE HELPS

- Runs a centre completely, including its profit and loss, while user accounts, roles and system settings stay under central control.

LIMITS

Cannot manage users or roles and cannot change settings.

MENUS THEY SEE

Dashboard, Document Vault, Students, Trainers, Courses, Batches, Classrooms & Labs, Staff, Corporate Partners, Enquiries, Follow-ups, Admissions, Fee Collection, My Classes, Classroom, Attendance, Examinations, Results, Student Readiness, Rate Trainer, My Attendance, Certificates, Library, Inventory, Placements, My Portfolio, Institute Reports, Trainer Performance, Institute Settings, Global Settings

Academic Coordinator

59 permissions · 16 menus

The academic head who owns teaching delivery. Signs in through the **Administrator** door.

WHAT THEY CAN DO

- Create and change courses, batches and exams; manage syllabus, grades, attendance and results.
- Issue and revoke certificates.
- Override a student's job-readiness status and see every trainer's remedial tasks.
- Approve trainer leave, read anonymous trainer feedback, view reports.

WHY THIS ROLE HELPS

- Academics are fully in one person's hands, with no access to money at all. This keeps teaching and finance cleanly separated.

LIMITS

No access to fees or expenses.

MENUS THEY SEE

Dashboard, Document Vault, Students, Trainers, Courses, Batches, Classrooms & Labs, My Classes, Classroom, Attendance, Examinations, Results, Student Readiness, Certificates, Institute Reports, Trainer Performance

Front-Desk Registrar

30 permissions · 13 menus

The front desk: first contact and the cash counter. Signs in through the **Administrator** door.

WHAT THEY CAN DO

- Log enquiries, follow up, convert leads, handle admissions and student records.
- Collect fees and hand over receipts (the till).
- Run the attendance register and update the library.
- Internal chat and the Document Vault.

WHY THIS ROLE HELPS

- Takes payments but cannot change what a course costs, give a discount through the price list, or waive a fine. The person holding the cash never controls the prices, which protects against fraud.

LIMITS

No fee structure, no expenses, no settings.

MENUS THEY SEE

Dashboard, Document Vault, Students, Courses, Batches, Classrooms & Labs, Enquiries, Follow-ups, Admissions, Fee Collection, My Classes, Attendance, Library

Staff (Counsellor)

33 permissions · 12 menus

Counsellors and front-office staff. Signs in through the **Administrator** door.

WHAT THEY CAN DO

- The full lead lifecycle: enquiries, follow-ups and converting a lead into a student.
- Admissions and student records, collecting fees.
- Add and update corporate partners, resolve student flags, view reports.

WHY THIS ROLE HELPS

- Everything a counsellor needs to turn an enquiry into a paying student, on one set of screens.

LIMITS

Cannot price courses, delete records or touch academics.

MENUS THEY SEE

Dashboard, Document Vault, Students, Courses, Batches, Classrooms & Labs, Corporate Partners, Enquiries, Follow-ups, Admissions, Fee Collection, Institute Reports

Faculty (Trainer)

42 permissions · 11 menus

Teaching staff. Signs in through the **Trainer** door.

WHAT THEY CAN DO

- See their own batches, mark attendance, log daily topics and upload materials (My Classes).
- Publish classwork and homework and grade submissions (Classroom).
- Enter exam marks (Results).
- Evaluate students and sign off soft skills (Student Readiness); handle remedial tasks.
- Apply for leave, raise flags on students, use internal chat and the Document Vault.

MENUS THEY SEE

Dashboard, Document Vault, Students, Courses, Batches, My Classes, Classroom, Attendance, Examinations, Results, Student Readiness

WHY THIS ROLE HELPS

- A focused workspace: only their own batches, with nothing about fees or revenue.
- They are the gatekeeper of job-readiness. Only a trainer's recorded scores and sign-off can make a student Job-Ready.

LIMITS

Cannot see fees, cannot see their own student ratings, cannot block a student or override readiness.

Placement Officer

25 permissions · 8 menus

The placement and corporate relations team. Signs in through the **Placement Officer** door.

WHAT THEY CAN DO

- Post jobs, find eligible candidates, shortlist, run interview rounds and record outcomes (Placements).
- Add and update corporate partners and their contacts.
- Send communications, view students, courses, batches and reports.

MENUS THEY SEE

Dashboard, Document Vault, Students, Courses, Batches, Corporate Partners, Placements, Institute Reports

WHY THIS ROLE HELPS

- Works like an internal recruitment agency: the system hands them only students who genuinely meet the bar, and explains exactly why others are blocked.

LIMITS

Can read readiness but cannot grant it. Job-Ready is decided by trainers and data, not by sales. No fees, grades or roles.

Student

19 permissions · 7 menus

Enrolled learners. Signs in through the **Student** door.

WHAT THEY CAN DO

- Check in to class with the trainer's 6-digit code and see their attendance percentage (My Attendance).
- Receive and submit classwork and homework (Classroom).
- Rate their trainers anonymously (Rate Trainer).
- Build a portfolio: resume, GitHub, projects, skills (My Portfolio).
- Read-only access to their own results, fee status, certificates, library and placement openings.
- A private Document Vault.

WHY THIS ROLE HELPS

- Always sees their own progress, and exactly why they are or are not being put forward for jobs. Nothing is hidden from them.

LIMITS

Can only ever see their own records. Cannot see other students.

MENUS THEY SEE

Dashboard, Document Vault, Classroom, Rate Trainer, My Attendance, Library, My Portfolio

Super Admin, Administrator and Branch Head hold nearly every permission, so they also see the student self-service menus (Rate Trainer, My Attendance, My Portfolio). Those pages are meant for students.

5 Who sees which menu

A tick means the menu item appears for that role as the software ships. This is worked out from the actual permission rules, not typed by hand.

6 Step-by-step workflows

The common journeys through the software, in the order the work actually happens.

A Setting up the institute (first day)

Done by: Super Admin or Administrator

1. Sign in through the **Administrator** door with the account created at installation.
2. **Settings** → **Global Settings**: fill **Institute details**, then the **Scheduling policy** (opening and closing time, maximum batches per trainer per day), **Bank details** and **Default terms**. Set the **Admission, Fee Receipt** and **Certificate** numbering for this academic year. Press **Save** on each card.
3. **Master** → **Classrooms & Labs**: add every room with its real seating capacity.
4. **Settings** → **User Management**: create accounts for trainers, counsellors, the registrar, the coordinator and the placement officer, choosing each person's role.
5. **Settings** → **Roles & Permissions**: review what each role can do and adjust it if your institute works differently.
6. **Master** → **Courses** → **Add New Course**: enter each course and tick **Schedule the first batch now** to create its first batch with trainer, room, weekdays and timings.
7. **Admissions** → **Fee Collection** → **Fee plans**: create the fee plan for each course (base fee, registration fee, GST, number of installments).
8. **Master** → **Corporate Partners**: add the companies that hire your students or sponsor training.

B From enquiry to enrolled student

Done by: Staff (Counsellor) or Front-Desk Registrar

1. **Admissions** → **Enquiries** → **+ Log New Lead**: name and phone (required), the course they want, qualification and source. Set the lead to Hot, Warm or Cold.
2. Press **Callback** to schedule the next call; it appears in **Follow-ups**. Log every call with a note and the next date.
3. When the person decides to join, press **Convert**. The student record and the admission are created in one step, and the admission number comes from your numbering settings.
4. Walk-in who never enquired? Use **Master** → **Students** → **New Student** instead. Applications can also go through **Admissions**: verify the documents, then set the status to **approved**. Approval creates the student.
5. **Fee Collection** → **Fee plans** → **Assign to a student**: pick the plan and any discount. The dated installment schedule is generated for you.
6. **Fee Collection** → **Dues** → **Collect**: take the payment. It is applied to the oldest unpaid installment first and gets the next receipt number.
7. Check the student is in a batch (Students → pencil → Course, then Batch).

A trainer's class day

Done by: Faculty (Trainer)

1. **Academics** → **My Classes**: today's classes appear; pick another date at the top if needed.
2. Open a class. **Attendance** tab: tap P, A or L for each student (or **All present**) and press **Save Attendance**. Students can also check themselves in with the class code.
3. **Topics** tab: write what you taught and for how long, then **Log Topics**.
4. **Materials** tab: upload slides, code or lab files.
5. **Academics** → **Classroom** → **Publish work**: classwork, homework, a lab or material with a due date. Open **View submissions** to download and grade.
6. **Academics** → **Student Readiness**: record evaluations, sign off soft skills and clear remedial tasks.

Exams and results

Done by: Academic Coordinator or Trainer

1. **Academics** → **Examinations**: create the exam with title, batch, date, total marks and passing marks.
2. After the exam, **Academics** → **Results**: pick the batch and exam, enter each student's marks and press **Save**. The grade is calculated and the student is notified.

Issuing a certificate

Done by: Academic Coordinator or Administrator

1. **Resources** → **Certificates** → **Issue certificate**, then pick the student.
2. Four checks run at once: course completed, final assessment passed, fees cleared (including late fees), attendance at or above the threshold.
3. All four pass: press **Issue**. The number comes from your Certificate numbering.
4. Any check fails: the button stays blocked until you write an override reason, which is kept permanently on the record.
5. A certificate can be revoked with a written reason; the public verification page then reports it as invalid.

Placing a student

Done by: Placement Officer

1. **Master** → **Corporate Partners**: add the company and its contact people.
2. **Resources** → **Placements** → **Jobs**: post the job with the required skills and the attendance and score bars.
3. **Find candidates**: the system splits students into **Eligible** and **Near misses** (with the exact reason).
4. Shortlist, then move each application through internal screening, client rounds, offered and placed. Stages cannot be skipped.
5. A failed round: tag the skills that let the student down. Each tag becomes a remedial task for their trainer.
6. **Skill gaps** tab: skills companies keep rejecting students for. A repeated gap is a curriculum problem.

A student's journey

Done by: Student

1. Register through the **Student** door (or get an account from the institute) and verify the email with the one-time code.
2. **Dashboard**: your own summary.
3. **Academics** → **My Attendance**: when the trainer opens check-in, type the 6-digit code to mark yourself present.
4. **Academics** → **Classroom**: open assigned work and press **Submit work** (ZIP, PDF, DOC or image, up to 25 MB) before the due time.
5. **Academics** → **Rate Trainer**: rate each trainer on four areas, completely anonymously.
6. **Resources** → **My Portfolio**: upload a text-based PDF resume, add GitHub, projects, LinkedIn and skills, and see the three conditions for being put forward for jobs.

7 Menu reference: every screen and form

Each screen, in menu order: what it is for, who can open it, how to use it, how to fill in and save its form, and what is good to know. The same text is available inside the software under the ? button.

Always on the menu bar

Dashboard

/dashboard

WHO CAN OPEN IT **Super Admin** **Administrator** **Branch Head** **Academic Coordinator** **Front-Desk Registrar**
Staff (Counsellor) **Faculty (Trainer)** **Placement Officer** **Student**

A live snapshot of the whole institute — students, fees, attendance and alerts.

HOW TO USE IT

1. Read the top cards: total students, active courses, batches and pending admissions.
2. The second row shows money: fees collected, collected this month, and outstanding dues.
3. Red "Drop-out risk" card lists students who are missing classes or assignments — click through to act.
4. Amber "Escalated feedback" card shows anonymous complaints that need your attention.

GOOD TO KNOW

- Numbers update in real time — no refresh needed.
- A fresh install shows 0 everywhere until you add data.

Document Vault

/documents

WHO CAN OPEN IT **Super Admin** **Administrator** **Branch Head** **Academic Coordinator** **Front-Desk Registrar**
Staff (Counsellor) **Faculty (Trainer)** **Placement Officer** **Student**

Your own private drive inside the ERP — upload documents, sort them into folders, tag them, and share them with named people.

HOW TO USE IT

1. MY FILES is your own vault. Nobody else can see it unless you share something.
2. Click a folder to open it; the breadcrumb above the grid takes you back.
3. Use the All / Folders / Files chips to narrow what the grid shows, and the tag chips to filter by tag.
4. Search finds folders and files by name across your WHOLE vault, not just the folder you are in.
5. Hover any card for its actions: download, share, rename, delete.
6. SHARED WITH ME lists what other people gave you. SHARED BY ME lists what you gave away — and lets you take it back.

FILLING IN AND SAVING

To add a document press "Upload": drop a file (or click to browse), optionally rename it, tick the tags that apply, and press "Upload". To make a folder press "New Folder", type a name and press "Create folder".

To share, hover an item and press the share icon: pick the people, choose "View only" or "View & download", optionally set an expiry date, and press "Share with".

GOOD TO KNOW

- Sharing a FOLDER also shares everything inside it — including files you add to it later.
- "View only" means they can open it but not save a copy. "View & download" lets them keep it.

- Deleting a folder also deletes every file inside it.
- Admins can see every vault under the "All Files" tab; ordinary users only ever see their own.

Master

Students

/students

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Front-Desk Registrar

Staff (Counsellor)

Faculty (Trainer)

Placement Officer

The master list of every student, with their course, batch and drop-out risk.

HOW TO USE IT

1. Use the search box to find a student by name, email or admission number.
2. Use the status filter to see only Active, Completed, Dropped or Suspended students.
3. The "Retention" column flags students at risk — red = high risk, amber = watch.
4. Click the pencil () on any row to edit that student.

FILLING IN AND SAVING

Click "New Student" (top-right) to admit a student. Fill the name (required), then course and batch, then click "Admit student".

GOOD TO KNOW

- Only students with an active enrollment appear in a trainer's roster.
- A student flagged red is missing classes — contact them.

New Student Admission — how to fill this form

Register a new student and allocate them to a course and batch.

HOW TO USE IT

1. STUDENT DETAILS: type the full name (this is the only required field). Add mobile, email, date of birth, gender and highest qualification.
2. COURSE & BATCH: pick the Course first — the Batch list then shows only batches of that course.
3. Set the Admission date and Status (leave as "active" for a new student).
4. GUARDIAN: add the parent/guardian name and mobile for emergencies.

FILLING IN AND SAVING

Click "Admit student" (top-right) to save. If a field is invalid, a red message appears at the top telling you exactly what to fix. Click "Cancel" to leave without saving.

GOOD TO KNOW

- The admission number is generated automatically — you do not type it.
- Pick the Course before the Batch, or the batch list will not filter.

Edit Student — how to change and save

Update an existing student: their details, course/batch allocation or status.

HOW TO USE IT

1. The form opens pre-filled with the current record.
2. Change only what you need — everything else stays as it is.

3. To move the student to another course, pick the new Course first, then the Batch.
4. To mark them as finished or left, change the Status (completed / dropped / suspended).

FILLING IN AND SAVING

Click "Update student" (top-right) to save your changes. If something is invalid, a red message at the top says exactly what to fix. Click "Cancel" to leave WITHOUT saving — nothing is changed.

GOOD TO KNOW

- Changing status to "completed" or "dropped" also closes their open batch enrollments.
- The admission number cannot be changed — it is permanent.

Trainers

/trainers

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

The master list of all trainers (faculty) at the institute.

HOW TO USE IT

1. Search a trainer by name, department or specialisation.
2. Click a trainer to view or edit their profile — department, qualification, experience.
3. Assign a trainer to a batch from the Batches page, not here.

FILLING IN AND SAVING

Use the "Add" button at the top to create a trainer. Fill name and email, then save.

GOOD TO KNOW

- A trainer can only log in once their profile is linked to a user account — that happens automatically when they register.
- The system blocks assigning a trainer to two overlapping batches.

New Trainer — how to fill this form

Add a trainer so they can be assigned to batches.

HOW TO USE IT

1. TRAINER DETAILS: full name is required. Everything else is optional but worth filling.
2. Give their email — it is used for their login and for institute email alerts.
3. ROLE & EXPERTISE: department, designation, the subjects they can actually teach, qualification and years of experience.
4. Leave Status as "active" unless they have already left.

FILLING IN AND SAVING

Press "Add trainer" (top-right). Press "Cancel" to leave without saving.

GOOD TO KNOW

- A trainer who signs up on the trainer portal gets their record created automatically on OTP verification — you do not need to add them twice.
- Assign batches from the BATCH form, not here.

Edit Trainer — how to change and save

Update a trainer's profile, expertise or status.

HOW TO USE IT

1. The form opens pre-filled.
2. Change only what needs changing.
3. Set Status to "inactive" when a trainer leaves — they stay on past records but cannot take new batches.

FILLING IN AND SAVING

Press "Update trainer" (top-right) to save. Press "Cancel" to leave without saving.

GOOD TO KNOW

- Changing the email changes the address their alerts go to.
- Their anonymous student ratings are on the Trainer Performance page, not here.

Courses

/courses

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Front-Desk Registrar

Staff (Counsellor)

Faculty (Trainer)

Placement Officer

All courses the institute offers, with their schedule, trainer and fee.

HOW TO USE IT

1. The table shows each course with its duration, fee, trainer and batch dates.
2. "Not scheduled" means the course exists but has no batch yet — students cannot join until you schedule one.
3. Use search to find a course by name or code.

FILLING IN AND SAVING

Click "Add New Course" (top-right). Fill COURSE DETAILS (code and name are required), then tick "Schedule the first batch now" to also set dates, timings, trainer and classroom. Click "Create course & schedule".

GOOD TO KNOW

- The system checks for trainer double-booking, classroom clashes, seating capacity and operating hours BEFORE saving. If there is a conflict, nothing is created and a red message tells you exactly what clashed.
- You can create the course alone and schedule the batch later — just untick the schedule box.

New Course — how to fill this form

Create a course, and optionally schedule its first batch in the same step.

HOW TO USE IT

1. COURSE DETAILS: type a short unique course code (e.g. PY-101) and the course name. These two are required — everything else is optional.
2. Fill department, duration, credits and fee. The fee is what a student is billed for the whole course.
3. Tick "Schedule the first batch now" if classes are ready to start. Untick it to register the curriculum only.
4. FIRST BATCH: give the batch a code and name, pick the start/end dates, the daily start/end time, and tap the weekdays it runs on.
5. Choose the trainer and the classroom, and set how many seats the batch has.

FILLING IN AND SAVING

Press "Create course & schedule" (top-right). The course and the batch are written together in one transaction — if the schedule clashes with anything, NOTHING is created and the red banner tells you exactly what clashed. Press "Cancel" to leave without saving.

GOOD TO KNOW

- Before saving, the server checks five things: trainer double-booking, the trainer's daily batch limit, room double-booking, seating capacity, and the institute's operating hours.
- A batch with no weekdays ticked is treated as running EVERY day, and will clash with everything. Always tick the real days.

Edit Course — how to change and save

Update a course. Its timings live on its batches, so they are changed from the batch form.

HOW TO USE IT

1. The form opens pre-filled with the current course.
2. Change only what needs changing — everything else stays as it is.
3. Fee, duration and description can be updated at any time.

FILLING IN AND SAVING

Press "Update course" (top-right) to save. Press "Cancel" to leave without saving — nothing changes.

GOOD TO KNOW

- To change class dates, timings, trainer or classroom, edit the BATCH, not the course.
- The course code must stay unique across the institute.

Batches

/batches

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Front-Desk Registrar

Staff (Counsellor)

Faculty (Trainer)

Placement Officer

Scheduled runs of a course — with timings, trainer, classroom and students.

HOW TO USE IT

1. Each batch shows its course, trainer, timing and how many students are enrolled.
2. Assign a trainer to a batch here — the system blocks a clash.
3. Students are added to a batch from the Students page or on admission.

FILLING IN AND SAVING

Click the add button, fill batch code, name, timings and days, then save.

GOOD TO KNOW

- A batch with no start/end time is treated as "all day, every day" and will clash with everything — always set real timings.
- Seats cannot exceed the classroom capacity.

New Batch — how to fill this form

Schedule a real batch: which course, at what time, with which trainer, in which room.

HOW TO USE IT

1. BATCH DETAILS: batch code, batch name and the course are required.
2. SCHEDULE: pick the start date, the daily start and end time, and tap the weekdays the class runs on.
3. TRAINER & ROOM: choose the trainer and the classroom, then set the number of seats.
4. If you type more seats than the room holds, a red warning appears immediately.

FILLING IN AND SAVING

Press "Create batch" (top-right). The server re-checks everything before writing the row — trainer double-booking, the trainer's daily limit, room clashes, capacity and operating hours. If any check fails, the batch is NOT created and the reason appears in the red banner.

GOOD TO KNOW

- A batch with no start/end time is treated as ALL DAY, and one with no weekdays as EVERY DAY — both will clash with everything. Always set real timings.
- Students are attached to a batch from the student form or at admission.

Edit Batch — how to change and save

Change a batch's timings, trainer, room or status.

HOW TO USE IT

1. The form opens pre-filled with the current schedule.
2. Change the timings, weekdays, trainer or room as needed.
3. Set Status to "completed" when the batch finishes, or "cancelled" if it never ran.

FILLING IN AND SAVING

Press "Update batch" (top-right). The conflict checks run again on the CHANGED schedule — moving a batch onto a time the trainer or room is already busy will be rejected, and the batch stays as it was.

GOOD TO KNOW

- The batch is checked against every OTHER batch, never against itself — so re-saving without changes always works.
- Reducing seats below the number of students already enrolled will be rejected.

Classrooms & Labs

/rooms

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Front-Desk Registrar

Staff (Counsellor)

The physical rooms a batch can be scheduled into.

HOW TO USE IT

1. The list shows each room, its type (classroom or lab), seats and whether it is free.
2. Filter by Classroom or Lab using the chips.
3. "In use" tells you how many active batches occupy that room.

FILLING IN AND SAVING

Click "Add Room". Fill room code and name (required), choose Classroom or Lab, set seating capacity and location, then click "Add room".

GOOD TO KNOW

- Seating capacity matters: a batch with more seats than the room holds will be REJECTED when scheduling.
- Two batches cannot use the same room at overlapping times.

Staff

/staff

WHO CAN OPEN IT **Super Admin** **Administrator** **Branch Head**

Non-teaching staff — front office, accounts, administration.

HOW TO USE IT

1. Search staff by name or department.
2. Click a row to edit their details and permissions.

FILLING IN AND SAVING

Use the add button, fill name and department, then save.

GOOD TO KNOW

- Staff permissions are controlled from Settings → Roles & Permissions.

Corporate Partners

/partners

WHO CAN OPEN IT **Super Admin** **Administrator** **Branch Head** **Staff (Counsellor)** **Placement Officer**

The companies the institute does business with — they sponsor corporate training batches and they hire our students.

HOW TO USE IT

1. The table lists every partner with their PAN, GSTIN, corporate office and training venue.
2. Search matches the company name, PAN, GSTIN or city.
3. The coloured badge says what the relationship is: Hiring, Training, or both.
4. Click the blue contacts pill on the right to expand the people at that company — their designation, phone and email.
5. Row buttons: pencil edits, the list icon expands contacts, the bin deletes.

FILLING IN AND SAVING

Press "Add Partner" (top-right) to open the form. Press "Deleted" to switch to the deleted list, where each row has a restore button.

GOOD TO KNOW

- Deleting is SOFT — the partner moves to the "Deleted" list and their invoices and placement history are kept. Nothing is lost, and you can restore them.
- The primary contact is the one shown first, and is who the team should call by default.

New Partner — how to fill this form

Add a company that will sponsor training, hire students, or both.

HOW TO USE IT

1. COMPANY: the company name is required. Pick the relationship — Hiring, Corporate training, or both.
2. TAX IDENTITY: type the GSTIN and the PAN fills itself in, because a GSTIN carries the PAN inside it (characters 3–12).

3. ADDRESSES: the corporate office address is what gets printed on their invoice. The training venue is only needed when training runs at their site instead of our campus.
4. CONTACT PEOPLE: press "Add contact" for each person — name, designation, phone, email. Tick "Primary contact" for the one the team should call first.

FILLING IN AND SAVING

Press "Add partner" (top-right). If the PAN or GSTIN is malformed, or the two disagree with each other, the form says so in red and the save button stays disabled until you fix it.

GOOD TO KNOW

- PAN looks like ABCDE1234F. GSTIN is 15 characters: state code + PAN + 3 more.
- A GSTIN can only belong to one partner — reusing one is rejected and names the company that already has it.
- Only one contact can be primary; ticking a new one unticks the old.

Edit Partner — how to change and save

Update a partner's details, tax identity, addresses or contact people.

HOW TO USE IT

1. The form opens pre-filled, with the existing contacts listed at the bottom.
2. Change only what needs changing.
3. Edit a contact in place, add a new one with "Add contact", or press "Remove" to delete one.

FILLING IN AND SAVING

Press "Update partner" (top-right). Contacts are saved along with the partner. Press "Cancel" to leave without saving.

GOOD TO KNOW

- Removing a contact takes effect immediately — it is not undone by pressing Cancel.
- Changing the GSTIN re-runs the same validation as a new partner, including the check that no other partner already uses it.

Admissions

Enquiries

/enquiries

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Front-Desk Registrar

Staff (Counsellor)

Every person who enquired about a course — track them until they join.

HOW TO USE IT

1. The KPI strip shows total leads, hot leads, callbacks due today, and your conversion rate.
2. Filter by temperature: Hot (very interested), Warm, Cold.
3. Tick "Callbacks due" to see only the people you promised to call back.
4. Change a lead's temperature straight from the dropdown in its row.
5. Click "Callback" to schedule a follow-up call — the lead moves to "contacted" automatically.

FILLING IN AND SAVING

Click "+ Log New Lead". Name and Phone are required. Add the course they want, their qualification, and where they came from (walk-in, website, referral). Click "Save Lead". To turn a lead into a student, click the green "Convert" button — it creates the student and admission in one click.

GOOD TO KNOW

- Convert requires a course — if the lead has none, you will be asked to pick one.
- A converted lead cannot be converted twice.

Follow-ups

/followups

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Front-Desk Registrar

Staff (Counsellor)

The call log for every lead — who was called, when, and what is next.

HOW TO USE IT

1. See all pending follow-ups sorted by date.
2. Open a lead to add a new follow-up note.

FILLING IN AND SAVING

Add a follow-up with a note and the next callback date, then save.

GOOD TO KNOW

- Follow-ups are created automatically when you schedule a callback from the Enquiries page.

Admissions

/admissions

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Front-Desk Registrar

Staff (Counsellor)

Applications from enquiry to approval.

HOW TO USE IT

1. Review each application and check the documents.
2. Change the status: pending → verified → approved (or rejected).
3. Approving an application automatically creates the student record.

FILLING IN AND SAVING

Open an application, verify the documents, then set the status to "approved".

GOOD TO KNOW

- Approve only after documents are verified and the initial fee is received.

Fee Collection

/fees

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Front-Desk Registrar

Staff (Counsellor)

Everything about money: what students owe, what a course costs, what the institute spends, and whether it made a profit.

HOW TO USE IT

1. DUES — everyone with an overdue installment, worst delay first. Late fees are shown separately from the fee itself.
2. FEE PLANS — a plan is the price of a course: base fee + registration + GST, and how many installments it splits into.
3. EXPENSES — rent, utilities, salaries, marketing. This is the other half of the books.
4. PROFIT & LOSS — money collected minus money spent for the period, plus "revenue leakage" (billed, overdue, never collected).

FILLING IN AND SAVING

To bill a student: Fee plans → "Assign to a student" → pick the student and plan, add any discount, and the schedule of dated installments is generated for you. To take money: Dues → Collect. The payment is applied to the OLDEST unpaid installment first.

GOOD TO KNOW

- You cannot collect more than is outstanding — the server refuses it.
- Overdue installments and late fees are raised automatically every night. "Run overdue check" just does it now instead of waiting.
- A fine can only be waived with a written reason, and it is recorded against your name.
- Reassigning a plan is refused once a student has paid anything, so a schedule cannot be rewritten underneath them.

Academics

My Classes

/my-classes

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Front-Desk Registrar

Faculty (Trainer)

Your day: today's classes, attendance, daily topics and materials.

HOW TO USE IT

1. Pick a date at the top (defaults to today).
2. Each class card shows the time, how many students, and whether attendance and topics are done.
3. Click a class to open it. Three tabs appear: Attendance, Topics, Materials.
4. ATTENDANCE: tap P / A / L for each student, or use "All present". Click "Save Attendance".
5. TOPICS: write what you taught today and the duration, then "Log Topics".
6. MATERIALS: upload slides, code or lab files for your students.

FILLING IN AND SAVING

Each tab has its own save button — Save Attendance, Log Topics, Upload. Saving topics again for the same day updates the existing entry (it does not duplicate).

GOOD TO KNOW

- You can only see and edit batches assigned to YOU.
- Mark attendance within the first 15–20 minutes of class.

Classroom

/classroom

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Faculty (Trainer)

Student

Classwork and homework — trainers publish it, students submit it.

HOW TO USE IT

1. TRAINER: you see everything you have published for your batches. Filter by type or batch.
2. Click "View submissions" on any item to see who submitted, download their file, and give a grade.
3. STUDENT: you see the work assigned to you. Overdue items are outlined in red.

FILLING IN AND SAVING

TRAINER — click "Publish work": choose the batch and type (Classwork / Homework / Lab / Material), write the title and instructions, set the time duration and due date, attach a file, then click "Publish". Students are notified instantly.

STUDENT — click "Submit work": write a note, attach your file (ZIP, PDF, DOC or image, up to 25 MB), and click "Submit". You can resubmit — it replaces the old file.

GOOD TO KNOW

- Submitting after the due date is marked "late" automatically.
- A trainer can only publish to batches assigned to them.

Attendance

/attendance

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Front-Desk Registrar

Faculty (Trainer)

The attendance register for every batch.

HOW TO USE IT

1. Choose a batch and a date to open the register.
2. Mark each student Present, Absent or Late.
3. The percentage is calculated automatically.

FILLING IN AND SAVING

Mark every student, then click Save. Saving again for the same date updates the marks (it does not duplicate).

GOOD TO KNOW

- Students below 75% attendance are automatically warned by email.
- Three absences in a row flags the student as a drop-out risk on the admin dashboard.

Examinations

/examinations

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Faculty (Trainer)

Schedule exams for a batch and issue hall tickets.

HOW TO USE IT

1. See all scheduled exams.
2. Create an exam with a date, total marks and passing marks.

FILLING IN AND SAVING

Click add, fill the exam title, batch, date and marks, then save.

GOOD TO KNOW

- Results are entered from the Results page after the exam.

Results

/results

WHO CAN OPEN IT **Super Admin** **Administrator** **Branch Head** **Academic Coordinator** **Faculty (Trainer)**

Enter marks and publish results.

HOW TO USE IT

1. Pick the batch and exam.
2. Enter marks for each student — the grade is calculated automatically.

FILLING IN AND SAVING

Enter the marks and click Save. The student is notified immediately.

GOOD TO KNOW

- Marks cannot be more than the exam total.
- Re-saving updates the mark; it does not create a duplicate.

Student Readiness

/readiness

WHO CAN OPEN IT **Super Admin** **Administrator** **Branch Head** **Academic Coordinator** **Faculty (Trainer)**

Decide who is ready for the job market — and pick up what the market sent back.

HOW TO USE IT

1. Pick a batch. Each student shows attendance, weighted technical score, and whether you have signed off their soft skills.
2. EVALUATE — record a mock test, code review, lab exam, mock interview or project. Weight matters: a final lab exam should outweigh a pop quiz.
3. Verifying a skill while grading is what makes it visible to recruiters — a student's own claim is not enough.
4. SIGN OFF soft skills when the student is genuinely presentable.
5. REMEDIAL TASKS — what interview rejections sent back to you, with the interviewer's own words.

FILLING IN AND SAVING

You cannot mark anyone Job-Ready. It is DERIVED: attendance $\geq$ 85%, weighted technical $\geq$ 75%, and your soft-skill sign-off. All three, or they are not ready.

GOOD TO KNOW

- Withdrawing your sign-off removes the student from the placement pool immediately.
- Marking a remedial task done re-checks the student — if they now clear the bar, they go straight back into the pool.

- Two out of three is not "nearly ready". A recruiter's minimum is not a rounding target.

Rate Trainer

/feedback

WHO CAN OPEN IT [Super Admin](#) [Administrator](#) [Branch Head](#) [Student](#)

Give anonymous feedback about your trainer.

HOW TO USE IT

1. You see the trainers of the batches you are enrolled in.
2. Click "Rate" next to a trainer.
3. Give 1–5 stars on four things: Clarity of teaching, Punctuality, Lab support, Doubt resolution.
4. Optionally write a comment.

FILLING IN AND SAVING

Rate all four areas, then click "Submit anonymously". You can submit once per trainer per cycle.

GOOD TO KNOW

- Your feedback is COMPLETELY ANONYMOUS. Your trainer never sees who submitted it — only the admin sees the ratings.
- Be honest; this is how teaching quality improves.

My Attendance

/my-attendance

WHO CAN OPEN IT [Super Admin](#) [Administrator](#) [Branch Head](#) [Student](#)

Mark yourself present in class, and see your overall attendance.

HOW TO USE IT

1. Your overall attendance percentage is at the top — green above 85%, amber above 60%, red below.
2. When your trainer opens check-in, a code box appears. Enter the 6-digit code they show on the class screen.
3. That marks you present for today. If it already shows today, you are done.

FILLING IN AND SAVING

Type the code and tap Check in. It only works while check-in is OPEN and only with your class's real code — being in the room is the whole point.

GOOD TO KNOW

- No code box means check-in is not open. Your trainer opens it during class.
- If your trainer marked you absent, the code will not override it — talk to them.

Resources

Certificates

/certificates

WHO CAN OPEN IT [Super Admin](#) [Administrator](#) [Branch Head](#) [Academic Coordinator](#)

Issue course-completion certificates — but only to students who have actually earned them.

HOW TO USE IT

1. The table lists every certificate issued, who approved it, and whether it is still valid.
2. Click "Issue certificate" and pick a student. The four eligibility checks run immediately.
3. Course completed · passed the final assessment · fees cleared (including any late fee) · attendance at or above the threshold.

FILLING IN AND SAVING

If all four checks pass, click Issue. If any fail, the button stays blocked until you write an override reason — and that reason is printed permanently on the certificate's record, next to the checks that failed.

GOOD TO KNOW

- A student cannot issue their own certificate. Issuing requires the certificates.issue permission.
- Issuing twice returns the same certificate number instead of minting a second one.
- Revoking requires a written reason and is permanent — the public verification page will report the certificate as invalid.

Library

</library>

WHO CAN OPEN IT [Super Admin](#) [Administrator](#) [Branch Head](#) [Front-Desk Registrar](#) [Student](#)

Books — search, add, issue and return.

HOW TO USE IT

1. Search a book by title, author or ISBN.
2. Issue a book to a student, or mark it returned.

FILLING IN AND SAVING

To add a book: fill title, author and number of copies, then save. To issue: pick the book and student, set a due date, then save.

GOOD TO KNOW

- A book cannot be issued if no copies are available.

Inventory

</inventory>

WHO CAN OPEN IT [Super Admin](#) [Administrator](#) [Branch Head](#)

Institute assets and stock — projectors, markers, equipment.

HOW TO USE IT

1. See every item with its quantity and reorder level.
2. Items below the reorder level are flagged as low stock.

FILLING IN AND SAVING

To add stock: choose the item, select "in" (received) or "out" (used), enter the quantity, and save.

GOOD TO KNOW

- You cannot take out more stock than you have.

Placements

/placements

WHO CAN OPEN IT **Super Admin** **Administrator** **Branch Head** **Placement Officer**

Run the institute like an internal recruitment agency: match Job-Ready students to real openings, run the interview rounds, and feed what goes wrong back to the trainer.

HOW TO USE IT

1. JOBS — post a JD. The skills you tag are a HARD filter, and the attendance/score bars are enforced by the server.
2. FIND CANDIDATES — the system splits students into ELIGIBLE (meets every requirement) and NEAR MISSES (blocked, with the exact reason).
3. PIPELINE — shortlisted → internal screening → client rounds → offered → placed. Stages cannot be skipped.
4. SKILL GAPS — every skill a company has rejected our students for, counted.

FILLING IN AND SAVING

Shortlist an eligible candidate with one click. To put forward someone who does NOT meet the bar you must write a justification — it is recorded on the application.

GOOD TO KNOW

- Only a trainer can make a student Job-Ready, and only by recording real scores and signing off soft skills. Placement cannot grant it.
- When you log a FAILED round, tag the skills that let the student down. Each tag raises a remedial task on that student's trainer and pulls the student out of the Job-Ready pool.
- If the same skill shows up across many students, that is a curriculum problem — look at the Skill gaps tab.

My Portfolio

/portfolio

WHO CAN OPEN IT **Super Admin** **Administrator** **Branch Head** **Student**

Your evidence of capability — and an honest mirror of why you are, or are not, being put forward for jobs.

HOW TO USE IT

1. The top panel shows the three conditions the placement team checks. Nothing is hidden from you.
2. Upload your resume. A TEXT-BASED PDF is indexed for keyword matching; a scanned image cannot be searched and the page will tell you so.
3. Add your GitHub, live projects and LinkedIn.
4. Claim the skills you have.

FILLING IN AND SAVING

Save. Your profile is what the placement team sees when they run a search for a real opening.

GOOD TO KNOW

- A skill you add yourself is only a CLAIM. Recruiters are shown trainer-verified skills — ask your trainer to assess you.
- Attendance below 85% or a technical score below 75% will keep you out of the pool, however good your portfolio is.

2. Export students, courses or fees as a CSV file.

GOOD TO KNOW

- Exports open in Excel.

Trainer Performance

/trainer-performance

WHO CAN OPEN IT

Super Admin

Administrator

Branch Head

Academic Coordinator

Anonymous student ratings of each trainer, plus one-click email tools.

HOW TO USE IT

1. Each trainer card shows their average star rating and a breakdown: Clarity, Punctuality, Lab support, Doubt resolution.
2. A red "Needs attention" badge means the rating dropped below 3.5.
3. Click "Read comments" to see anonymous written feedback.
4. EMAIL TRIGGERS (top): one click sends fee reminders, attendance warnings or low-feedback alerts to everyone who needs one.

FILLING IN AND SAVING

Click "Broadcast" to email all students: fill the subject and message, choose the audience (active / alumni / everyone), then click "Send broadcast".

GOOD TO KNOW

- Trainers CANNOT see this page — ratings bypass them completely.
- Re-running a trigger the same day will not spam anyone twice.

Your account

My Profile

/profile

WHO CAN OPEN IT

Everyone

Your own account details.

HOW TO USE IT

1. See your name, email and role.
2. Update your details.

FILLING IN AND SAVING

Change the fields and click Save.

GOOD TO KNOW

- To change your password, use "Forgot password?" on the login page.

8 Settings and Global Settings

Two kinds of settings live here. **Settings** is about this device: how the portal looks and behaves in your browser. **Global Settings** holds records that are the same for everyone: document numbering, the institute's details and the scheduling rules. Open either from the gear in the header or from the Settings menu.

Settings

</settings>

WHO CAN OPEN IT [Super Admin](#) [Administrator](#) [Branch Head](#)

How the portal behaves on this device, and the way into Global Settings and the masters.

PANEL	WHAT IT DOES
Appearance	Colour mode Light or Dark. Brand colour : seven swatches or any colour you pick; buttons, links and the header follow it. Page background : a tint behind the cards. Layout : shows the current menu style and width; Open the Switcher gives every layout option and Reset returns to the original look.
Language & typing	Screen language EN / मरा / हिं. CapsLock right now : while on, everything typed into a text field becomes UPPERCASE as it is typed, so a student's name reads the same on every screen and printout. Start every session with it on : the default for this device. Passwords, emails, numbers, dates and the sign-in screens are never changed.
Institute letterhead	A summary of the institute name, phone, email and academic year, with a button to Open Global Settings .
Masters	One-click shortcuts to Courses, Batches, Classrooms & Labs, Trainers, Staff, Library, Inventory, Corporate Partners, and (if your role allows) User Management and Roles & Permissions.
Data & backups	The last five backups with date and size. Back up now takes another (needs the settings.update permission).
About this install	The server address, whether this device is online, and the CapsLock state.

SAVING

Everything on this page saves the moment you change it. There is no Save button, and the choices apply to this browser only, so each computer can be set differently.

Global Settings

</settings/global>

WHO CAN OPEN IT [Super Admin](#) [Administrator](#) [Branch Head](#)

Everything a document needs that is not the document itself: its number, the institute's details, the scheduling rules, the bank block and the standard terms.

HOW TO USE IT

1. DOCUMENT NUMBERING: one card each for Admission, Fee Receipt and Certificate. Set the Prefix (e.g. ENV/ADM/), an optional Suffix (e.g. /2026-27), the Next serial number and how many Digits (4 gives 0001). "The next one will read" shows the result live.

2. INSTITUTE DETAILS: name, legal name, tagline, registration number, affiliation, GSTIN, PAN, address, city, state, pincode, phone, email, website, academic year, currency and timezone.
3. SCHEDULING POLICY: opening time, closing time and the maximum batches one trainer may take in a day. Every new or changed batch is checked against these.
4. BANK DETAILS & SIGNATORY: bank, branch, account holder, account number, IFSC, UPI ID, signatory name and role.
5. DEFAULT TERMS: the standard fee-receipt terms and the note for certificates.

FILLING IN AND SAVING

Every card has its own Save button, so changing a receipt prefix never re-saves the bank details. A green line confirms the save; a red line says what to fix.

GOOD TO KNOW

- Numbering runs per academic year (April to March). A new year starts its own series automatically.
- Numbers are handed out one at a time even when two counters save at the same moment, so a number is never issued twice. A payment that fails does not use up a number.
- If a series has never been saved, the system uses its automatic format (for example RCPT-20260915-A1B2).
- Without the settings.update permission the page is read-only.

Only roles with *settings.update* (Super Admin, Administrator) can save. Others see the page read-only.

User Management

/users

WHO CAN OPEN IT **Super Admin** **Administrator**

This is where every other person in the system comes from — trainers, the placement team, front-desk staff and students.

HOW TO USE IT

1. Add user → fill in name, email, a starting password, and choose the ROLE. The role decides what they can see and do.
2. Creating a TRAINER also creates their trainer profile; creating a STUDENT also creates their student record. Without that second half they could sign in and then be refused by every page — so the system does both.
3. Permissions shows exactly what an account can do. Those come from the ROLE, not the person.
4. Sign-in can be switched off without deleting the account.

FILLING IN AND SAVING

Save. The account works immediately — the password is NOT emailed, so hand it over yourself and ask them to change it.

GOOD TO KNOW

- Prefer disabling sign-in over deleting. Deleting removes the login; disabling keeps their history (marks they entered, fees they collected) attached to a real name.
- You cannot delete your own account, disable your own sign-in, or remove the last super admin — any of those would lock everyone out.
- An email can only be used once. A second account with the same email is refused.

Roles & Permissions

/roles

WHO CAN OPEN IT **Super Admin** **Administrator**

Control exactly what each role can see and do.

HOW TO USE IT

1. Pick a role (Admin, Trainer, Staff, Student, Placement).
2. Tick or untick each permission — for example, trainers cannot see fees or revenue.

FILLING IN AND SAVING

Tick the permissions you want and click Save. Changes apply the next time that user loads a page.

GOOD TO KNOW

- Permissions are enforced on the server, not just hidden in the menu — a blocked user gets "403 Forbidden" even if they type the URL.
- System roles cannot be deleted.

9 Rules the system enforces for you

These checks run on the server, so they apply no matter which screen, role or device is used.

Scheduling

- A batch is refused if its trainer is already teaching at that time, if it takes the trainer over the daily batch limit, if the room is already booked, if it has more seats than the room holds, or if it runs outside operating hours. Nothing is saved and the red banner names the clash.
- A batch with no timings counts as all day, and one with no weekdays as every day, so always enter real timings.
- Seats cannot be reduced below the number of students already enrolled.

Money

- You cannot collect more than a student owes.
- Payments always clear the oldest unpaid installment first.
- Overdue installments and late fees are raised automatically every night; running the check twice never doubles a fine.
- A fine can only be waived with a written reason, recorded against the person who waived it.
- A fee plan cannot be reassigned once the student has paid anything.
- Receipt, admission and certificate numbers are never handed out twice, even when two people save at the same moment.

Attendance and risk

- Students below 75% attendance are warned by email automatically.
- Three absences in a row flag the student as a drop-out risk on the Dashboard.
- A student's check-in code cannot override an absence the trainer has marked.

Certificates and placement

- A certificate needs four checks to pass, or a written override reason that stays on the record forever.
- Issuing twice returns the same certificate, never a second number.
- Job-Ready is calculated, not chosen: attendance at least 85%, weighted technical score at least 75%, and the trainer's soft-skill sign-off. All three are needed.
- Putting forward a student who does not meet a job's bar requires a written justification.

Accounts and safety

- Permissions are checked on the server for every request, not just hidden in the menu.
- You cannot delete your own account, disable your own sign-in, or remove the last Super Admin.
- Each email address can only belong to one account.
- Built-in (system) roles cannot be deleted.
- Deleting a corporate partner is a soft delete: their history stays and they can be restored.
- Trainer ratings are completely anonymous, and trainers cannot see the Trainer Performance page.

I cannot see a menu that a colleague can see.

Menus follow your role. Ask an Administrator to check your role in User Management, or the role's permissions in Roles & Permissions.

A batch will not save and shows a red message.

The message names the clash: trainer busy, trainer over the daily limit, room busy, too many seats, or outside operating hours. Change that one thing and save again.

A student is missing from a trainer's roster.

Only students with an active enrollment in that batch appear. Check the student's course, batch and status.

How do I change the look of my receipt numbers?

Settings → Global Settings → Fee Receipt numbering. Set the prefix, suffix, next serial and digits, then Save.

Should I delete a person who has left?

No. Disable their sign-in in User Management. Their history (marks entered, fees collected) stays attached to a real name.

A student cannot check in.

Check-in only works while the trainer has it open and only with that class's code. No code box means check-in is closed.

A student asks why they are not being sent to interviews.

Their My Portfolio page shows the three conditions (attendance, technical score, soft-skill sign-off) and which one they are missing.

Everything is in capital letters.

CapsLock is on. Turn it off in Settings → Language & typing.

Envision ERP user guide. Inside the software, the ? button on every page shows the same help in English, Marathi or Hindi.
